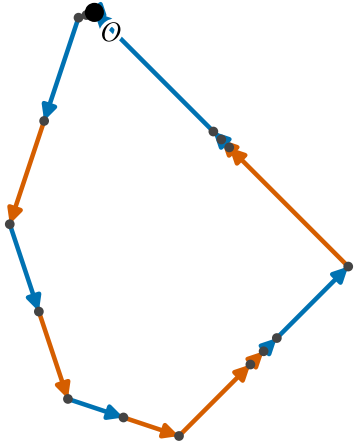
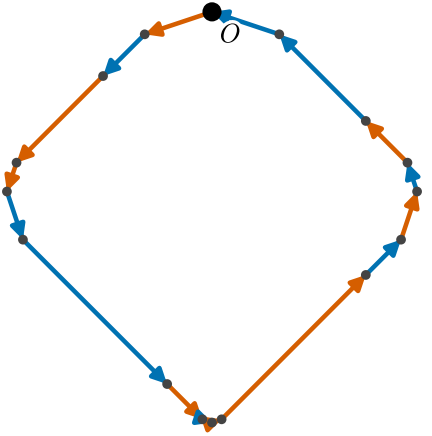
(a) Dürer

16 arrows $z_{ij}(x_{ij}, y_{ij})$ head to tail:
they close up, $\sum z\,(x, y) = (0, 0)$



(b) square #45

16 arrows $z_{ij}(x_{ij}, y_{ij})$ head to tail:
they close up, $\sum z\,(x, y) = (0, 0)$



edge colour: orange $z > 0$, blue $z < 0$; arrows are sorted by direction, so each chain is a closed convex polygon
