(a) hull vertex count
number of squares
hull vertices V
7 10 103 80 380 106 162 14 18
(b) volume (155 distinct values)
min 58
max 292/3
number of squares
volume of gem
(c) 352 combinatorial types
number of types
squares per combinatorial type
93 201 8 20 4 7 4 5 5 1 1 1 1 1
(d) V = 8 (square #54)
f = (8, 14, 8), V/N = 8/16
volume 84
(e) V = 16 (square #802)
f = (16, 36, 22), V/N = 16/16
volume 242/3
(f) max volume (square #379)
f = (12, 26, 16), V/N = 12/16
volume 292/3
