
(a) Kernel Drift vs. Discrete Snap Reality
I. Frozen Lattice
II. Slow Drift
III. Field Storm
IV. Centrifugal Balance
Hungarian discrete snap
Greedy discrete snap
Continuous $\mathcal{H}_{\text{ind}}(t)$ vs. Discrete $\mathcal{H}_{\text{line}}$

(c) 6-Tier Operator Ablation ($n = 4, 5$)
Order $n = 4$
Order $n = 5$
Tier 0: 2D Bubble Drift
Tier 1: 2-Exchange Quench
Tier 2: (2+3)-Cycle SA
Tier 3: + (2,2) Plaquette
Tier 4: + Candidate Swaps
Tier 5: + Funnel Leash
Tier 6: + ME-ILS Restarts
