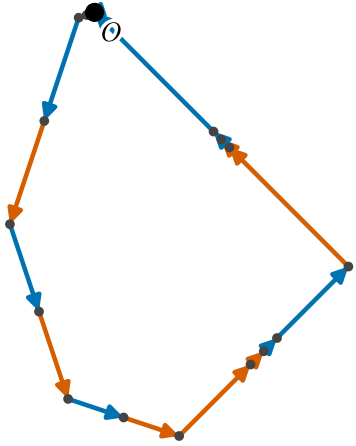
(a) Dürer

16 arrows $z_{ij}(x_{ij}, y_{ij})$ head to tail:

they close up, $\sum z(x,y) = (0,0)$



$\sum zxy$ by quadrant

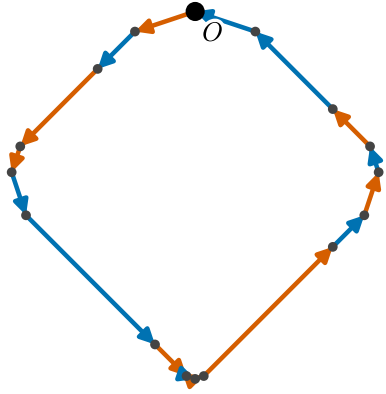
-10.5	+5.5
-5.5	+10.5

total $= 0$

(b) square #45

16 arrows $z_{ij}(x_{ij}, y_{ij})$ head to tail:

they close up, $\sum z(x,y) = (0,0)$



$\sum zxy$ by quadrant

+17.5	+17.5
+12.5	+12.5

total $= +60$

edge colour: orange $z > 0$, blue $z < 0$; arrows are sorted by direction, so each chain is a closed convex polygon
