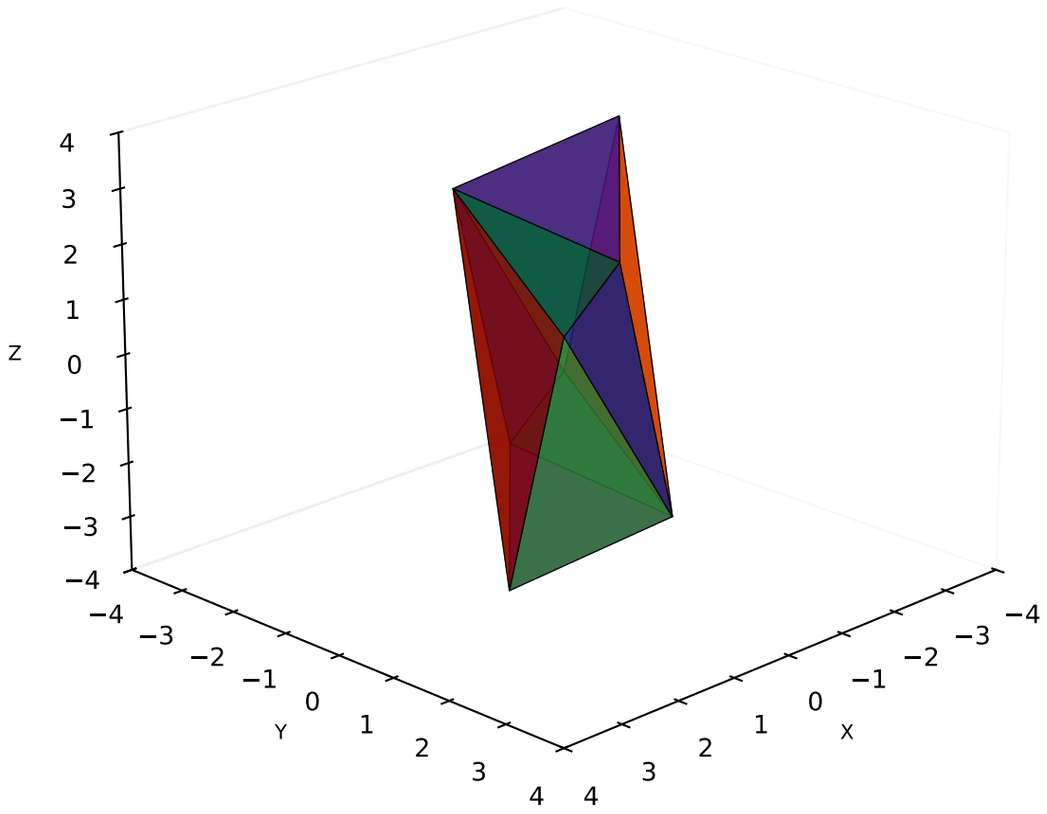
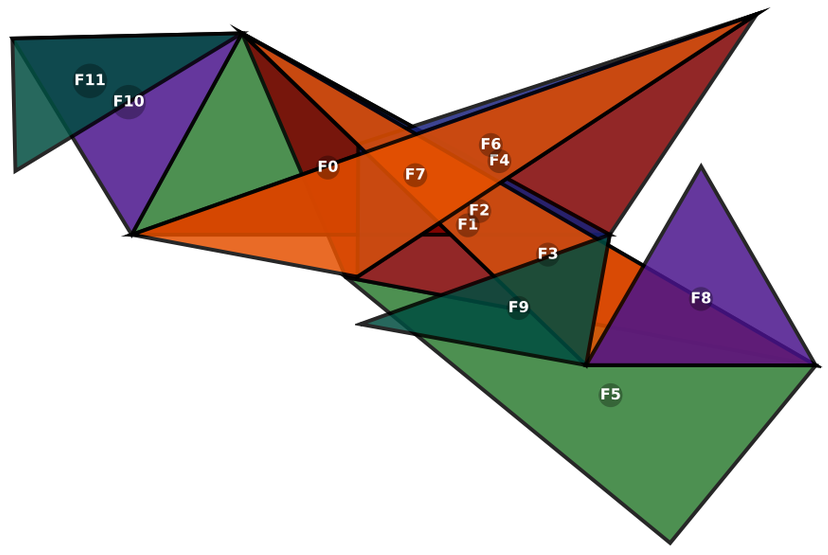
Magic Gems: Mirror-Symmetric Triangulations and Unfoldings

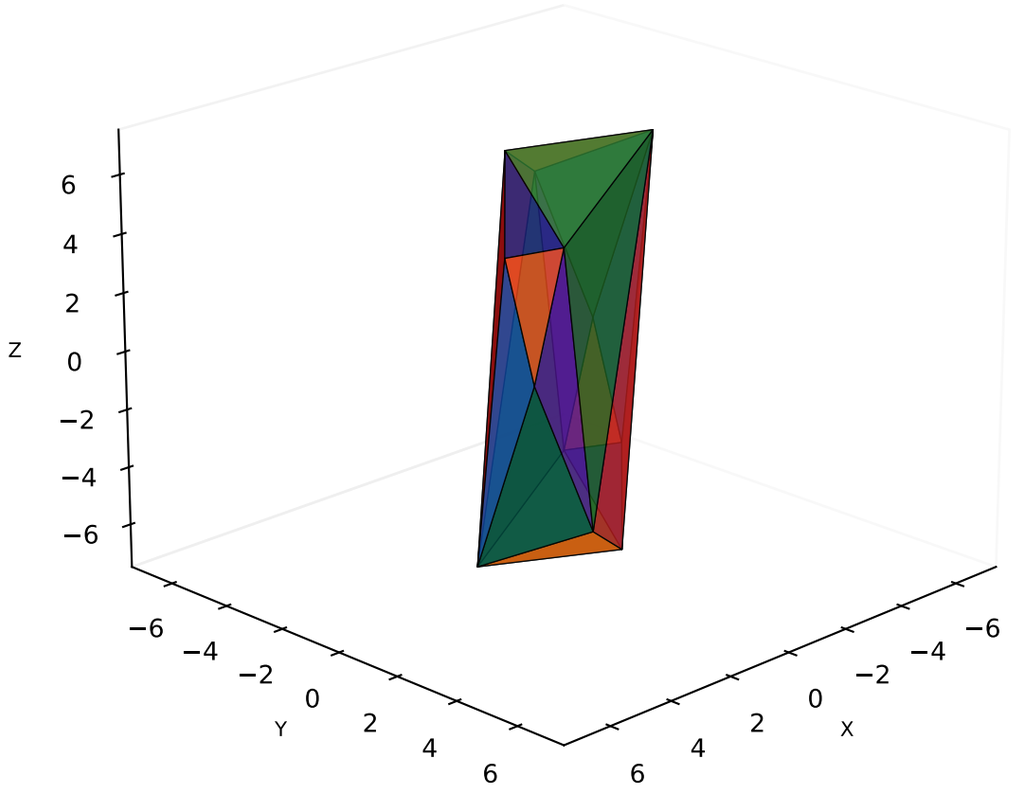
$n = 3$ **Magic Gem (3D)**



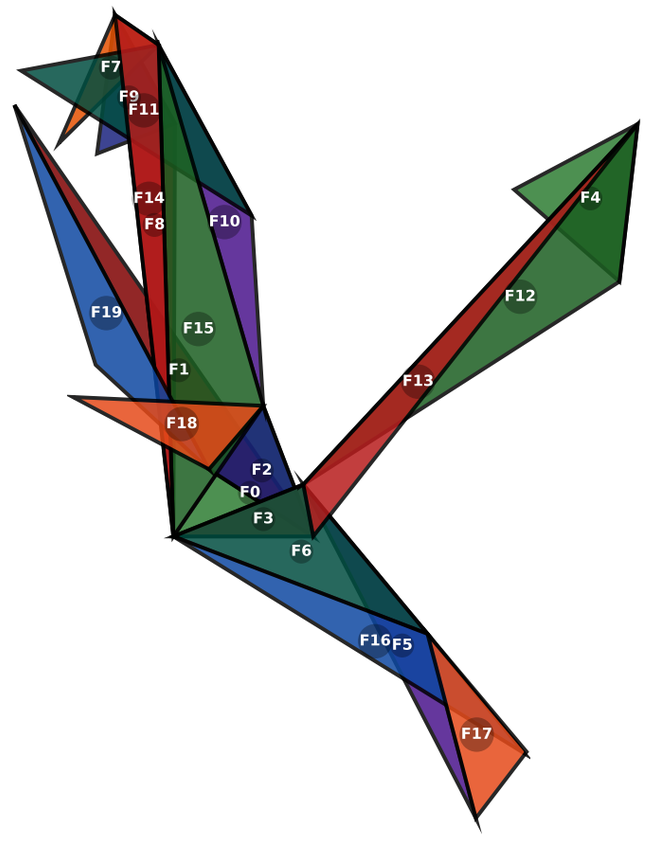
$n = 3$ **Flat Net (Mirror Pairs)**



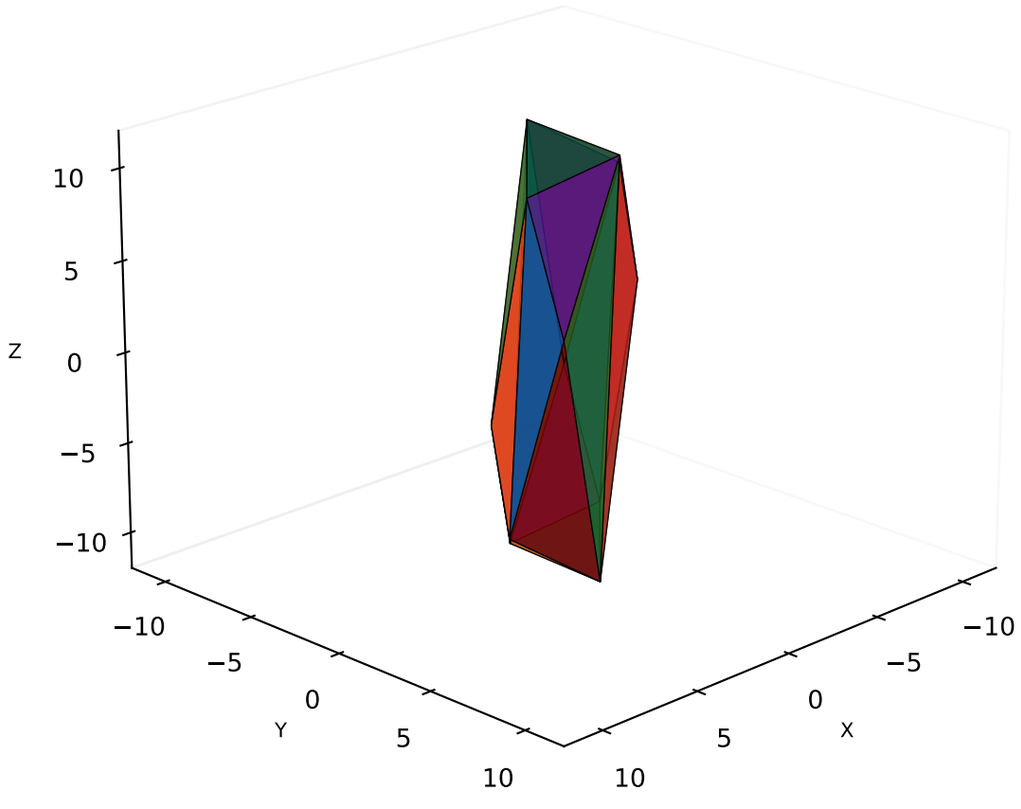
$n = 4$ **Magic Gem (3D)**



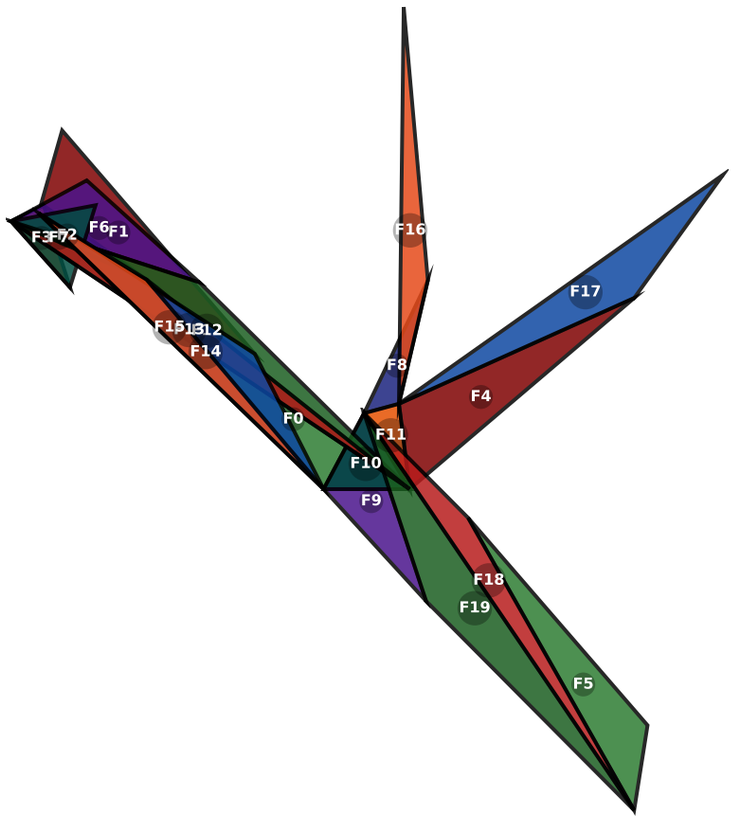
$n = 4$ **Flat Net (Mirror Pairs)**



$n = 5$ **Magic Gem (3D)**



$n = 5$ **Flat Net (Mirror Pairs)**



Each row shows a different order ($n = 3, 4, 5$). Left: 3D Magic Gem with mirror-symmetric pairs colored identically. Right: Flat net (orange-peel unfolding) showing spatial separation of mirror pairs. Faces with the same color are congruent triangles related by reflection (yin-yang positioning).
